

## Installation Theme.

- 1) Log in to the administrative panel of your store and go along the path:  
**Preferences > Themes**
- 2) In the top right of the page click on the button "**Add New Template**".
  - a. Click the Add File button in the "Section Import" from your computer.  
Find saved theme for example: .zip and select it.
  - b. Click the button "**Save**".
- 3) The process of loading the template may take a few minutes. After completion of loading the file at the bottom will be a new template.
- 4) To activate the theme, hover over the preview icon theme and click the button "**Use This Theme**".
- 5) The system will automatically load a theme. At any time you can return to an earlier version of the theme. At this point, if there is no error message it means that the template has been installed correctly.

## Configuration Theme

- 1) **Setting the main Slider.**
  - a. Follow the path **Modules > Modules and Services** in administrative panel and then select the "**Installed Modules**".
  - b. Find the module **Image Sliders** for your homepage. Then click the button **Configure**.
  - c. Then, take the page down and remove the sample images.
  - d. Click on the right side in the plus (+) and then add a new banner to sliders.
  - e. Select the banner of the package's folder **sample\_data > big\_banners** or use your own.
  - f. Type in the blanks (title, target link and optional description).
  - g. After entering the required data press the enable button and click "**Save**".

### **Warning!**

*At best option it will be if all banners are the same height and width (1920px).*

- 2) **Change logo.**
  - a. Go to the section **Preferences > Themes** in administrative panel.
  - b. Click a button **Add File** and then upload logo from a folder **sample\_data > logo**. Then click the button **Save**.

### **3) Change translation.**

- a. Follow the path: **International > Translations > Section "Add / Update a Language"**.
- b. Choose the language from the list and then click a buttons on the right side **"Add / Update a Language"**.

*If a translation was not correct than translated yourself in section "Modify Translations" or wait for update.*

### **Warning!**

*If for some reason you can not install and configure the theme then you will find a short film how to do it step by step in the same catalog.*
